This book is FREE. Feel free to pass it along.

I'm going to assume that you know what Traffic Exchanges are.

If you don't, maybe you've heard of the the world's largest..... Traffic Swarm.

My goal with this report is to show you how to make Traffic Exchanges work. 99% of the people out there, that are using traffic exchanges, are doing it all wrong.

Let's get started.

RULE #1

The ONLY kind of web page you should EVER list on a traffic exchange is an Opt-in capture page AKA Squeeze Page. Here's an example:

<http://www.webmasterautomation.com/special/>

Why? Because you've got 30 seconds or less to grab their attention. They are there for the same reason you are. To Advertise their business! With a good Squeeze Page you can easily add 50+ subscriber's a day to your opt -in list. Way more if your list building is set -up to be viral!

Now that you know the only type of page you should list, let me show you how to surf 8 traffic exchanges at once!

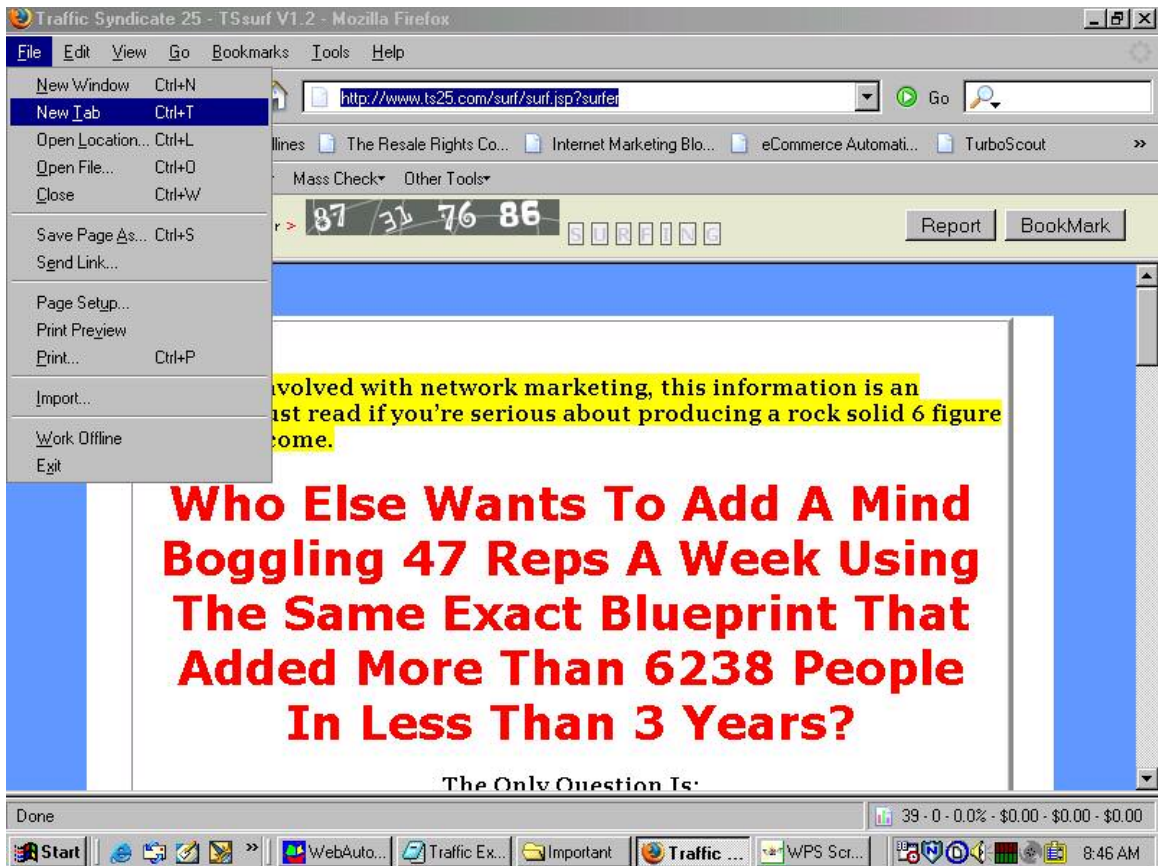

Download Fire Fox. <http://www.mozilla.com/firefox/>

There are other Tabbed browser's ie. Crazy Browser, but I prefer Fire Fox. It's extremely secure and not open to browser hi -jack's like the other Windows based browser's.

And the Built-In Pop-Up blocker is awesome! I've never had even one make it thru.

Once you've got Fire Fox installed click "File", then choose "New Tab".

See the Screen Shot below:

The **Next Screen Shot** shows how I have 7 windows open at once. You just go from tab to tab. You are now surfing 7 traffic exchanges in the same amount of time it would normally take to surf just one!

See Below...

20 High Traffic Exchanges

Below is a list of the biggest and the best. When your surfing 7-8 exchanges at a time you can build you list and your traffic really fast. I try to surf 100 pages per exchange. That's between 1500-2000 page views daily! Make sure you surf with your email client running in the background. The sound of the "Dings" from your new subscriber's is motivating ☺

Traffic Swarm

If you need help with your Squeeze Page I highly recommend

<http://listandtraffic2.com/go.php?3827>

You'll find an Opt-In template that you can modify to your sites design.

I hope you've found this list building strategy using Traffic Exchanges helpful.

Sincerely,

Michael L. Mayhew
